

COMPANY PROFILE 2026

Private label & contract manufacturing of premium nutraceuticals.

Food supplements for importers, distributors and private-label brands, backed by Lords Group's 13+ years of pharmaceutical manufacturing in Pakistan and UK and US entities, LORDS HEALTH LTD and Lords Healthcare LLC.

ABOUT US

A pharmaceutical group, now building nutraceuticals for the world.

Lords Group has manufactured pharmaceuticals in Pakistan for more than 13 years. Lords Healthcare is the nutraceutical brand of Lords Group, founded two years ago to bring the same GMP systems, documentation and batch discipline to food supplements.

Today our registered catalogue lists 220 formulations across eight dosage forms, available for private label, toll manufacturing, custom development and contract packaging. Formulation, manufacture and packing are done in-house at our own manufacturing facility, with the head office and export desk in Lahore and UK and US companies, LORDS HEALTH LTD in London and Lords Healthcare LLC in St. Petersburg, Florida.

- ✓ Own manufacturing facility
- ✓ Head office and export desk in Lahore
- ✓ UK and US companies: London and St. Petersburg, FL
- ✓ Formulation, manufacture & packing in-house

— WHY PARTNER WITH US

Built for importers, distributors and brand owners.

We manufacture food supplements to a written specification, document every batch and support the paperwork your importer needs, so you can build your range with confidence.

01

Pharmaceutical discipline

Our nutraceutical lines run under the quality management system of Lords Group, a pharmaceutical manufacturer with 13+ years of experience.

02

Certified and registered

ISO 9001:2015, GMP, DRAP-registered facility, HACCP, Halal, Non-GMO and Vegan. Certificate copies for qualified buyers.

03

220 registered formulations

A ready catalogue across eight dosage forms, available for your label or as a starting point for adaptation.

04

One partner, end to end

Formulation, manufacture, packing and export documentation in-house, so one team owns your project.

05

Practical commercial terms

MOQ 5,000 packs (negotiable to 3,000), 4-week lead time, samples dispatched immediately, T/T payment.

06

UK and US points of contact

LORDS HEALTH LTD (London) and Lords Healthcare LLC (St. Petersburg, FL) support partners in the UK, Europe and the US.

— HOW WE WORK

From brief to export shipment, in five controlled steps.

- 1 Brief & specification
- 2 Formulation & samples
- 3 GMP manufacture
- 4 QC release
- 5 Pack, document & ship

MANUFACTURING SERVICES

Four ways to build your supplement range with us.

SERVICE 01

Toll manufacturing

Your specification, manufactured in our own facility, with a batch file you can request.

Production of an agreed food-supplement specification at our own factory. The product name, pack and markets are agreed before a quotation.

- 1 Enquiry: market, dosage form and compositions
- 2 Specification: ingredients, grades and pack format
- 3 Quotation: written, with the commercial terms
- 4 Batch file: CoA and documents on request

FORMATS

Tablets · Capsules · Sachets · Syrups · Drops · Oral sprays · Lozenges

SERVICE 02

Private labelling

Your brand, an agreed composition, and pack artwork reviewed before we quote.

Manufacture of a food supplement that carries your brand, from a listed composition or a formulation agreed for the project. Artwork, pack size and labelling text are reviewed before quotation.

- 1 Brand brief: market, brand and presentations
- 2 Composition: ingredients and grades for the specification
- 3 Artwork: checked against the specification before print
- 4 Supply: manufacture, pack and batch documents

FORMATS

Any listed formulation, or an agreed composition

SERVICE 03

Custom formulations

A written composition for your brief, agreed before any manufacture.

We turn your brief into a written ingredient list, with grades and amounts per unit, that our factory can manufacture. Custom formulation takes about 3 months.

- 1 Brief: dosage form, markets, ingredients to include or avoid
- 2 Draft specification: amounts per unit for review
- 3 Agreement: specification fixed before quotation
- 4 Manufacture: production against that specification

FORMATS

Tablets · Capsules · Sachets · Syrups · Drops · Oral sprays · Lozenges

SERVICE 04

Contract packaging

Blister, bottle, sachet and related packs, agreed before the run.

Primary and secondary packing into the format named in the quotation, plus the carton or label that carries your agreed text.

- 1 Pack brief: dosage form, count per pack, markets
- 2 Components: blister, bottle, sachet, carton or label
- 3 Artwork: text and layout agreed against the specification
- 4 Packed batch: goods plus the documents you request

FORMATS

Blister packs · Bottles · Sachets · Cartons · Labels · Oral-spray packs

The factory does not authorise a product for sale in a destination market; product notification, registration and consumer labelling approval stay with the importer. Exclusivity, if any, is written into the agreement.

— MANUFACTURING FACILITY

Our own DRAP–registered facility, as it is.

A purpose-built facility operated with the GMP systems of a pharmaceutical manufacturer. Eight dosage-form lines run under one quality system, with in-house packing.

MANUFACTURING FACILITY

12 KM, Lahore Road, Layyah, Pakistan

Tablets

Capsules

Sachets

Syrups

Oral drops

Oral solutions

Lozenges

Oral sprays

Mixing in the liquids area

Staff in hairnets, masks and gloves mix a batch in a stainless-steel vessel.

Liquids area

Stainless-steel tank with level gauge, liquid filling machine and cap sealer.

Sachet packing

Sachet packing machine with printed film, beside a powder hopper.

Labelling

Labelling machine loaded with printed UCRAN Syrup labels.

Raw-material store

Labelled ingredient drums and cartons on racking.

Finished-goods warehouse

Packed LORD'S shipper cartons on racking, off the floor.

Unstaged photographs taken inside our facility. Facility visits, virtual walkthroughs and audits are arranged through the export desk.

— QUALITY & CERTIFICATIONS

Pharmaceutical-grade quality systems, applied to every batch.

Lords Healthcare, the nutraceutical brand of Lords Group, operates under the quality systems of a pharmaceutical manufacturer. Certificate copies are shared with qualified buyers on request.

ISO 9001:2015
Certified quality management system

GMP
Good Manufacturing Practice

DRAP registered
Drug Regulatory Authority of Pakistan registered facility

HACCP
Hazard Analysis and Critical Control Points

Halal
Halal certified

Non-GMO
Non-genetically modified ingredients

Vegan
Vegan-suitable options

Audit-ready

Certificate copies and a sample batch file for supplier qualification.

Quality management

An ISO 9001:2015 certified quality management system covering suppliers, production, testing and release.

Testing & release

Raw materials and finished batches are tested against the agreed specification before release.

Batch documentation

A Certificate of Analysis for every batch, plus specification sheets and stability data on request.

Quality controls

- ✓ Controlled raw-material receipt and quarantine
- ✓ Batch manufacturing records for every lot
- ✓ In-process checks and QC release
- ✓ In-house packing: blister, bottle, sachet, carton

PRODUCT RANGE

220 registered formulations, eight dosage forms.

Every formulation is available for private label or can be adapted. 25 products are in current production with finished pack shots; the others are manufactured on demand. Listings show composition only and are not health claims.

COMMERCIAL TERMS

Built for bulk supply.

Clear terms from the first conversation. The written quotation confirms the product, pack, quantity and terms for each order. Prices are not published.

MOQ 5,000 packs

Negotiable down to 3,000 packs per SKU.

Lead time 4 weeks

From confirmed artwork. About 3 months for custom formulations.

Samples dispatched immediately

Evaluate the product before you order.

Payment by T/T

Telegraphic transfer against confirmed orders.

Air & sea freight

Worldwide shipping by air or sea.

CoA with every batch

Certificate of Analysis shipped with each order.

The private-label process

- 1 Brief: market, brand name, products, pack format and quantity.
- 2 Samples: dispatched immediately for evaluation.
- 3 Specification and quotation: composition, pack and artwork requirements fixed; written quotation.
- 4 Artwork: checked against the agreed composition before print.
- 5 Production: about 4 weeks from confirmed artwork (about 3 months for a custom formulation).
- 6 Dispatch: by air or sea, with a CoA for every batch and other documents on request.

EXPORT & REGULATORY SUPPORT

Documentation your importer can rely on.

We prepare the manufacturing documentation buyers need to register and import food supplements, and LORDS HEALTH LTD and Lords Healthcare LLC give UK, European and US partners a local point of contact.

1

Market & documents brief

Tell us the destination market and the documents your importer needs.

2

Specification

Composition, grades and pack fixed in a written specification.

3

Artwork check

Pack artwork checked against the agreed composition and pack format; you approve the final wording.

4

Manufacture & QC release

Batch-recorded production, tested against the specification and released with a CoA.

5

Export documents

CoA per batch; specification sheets, stability data, Free Sale Certificate and DRAP GMP certificate on request.

6

Shipment

Packed shipper cartons with packing lists, dispatched by air or sea.

Documents available

- ✓ Certificate of Analysis for every batch
- ✓ Product specification sheets
- ✓ Stability data
- ✓ Free Sale Certificate
- ✓ DRAP GMP certificate on request
- ✓ Halal, HACCP & ISO certificate copies
- ✓ Product dossier support: composition, specification, method summaries, batch documents

RESPONSIBILITIES

Who does what

Lords Healthcare manufactures to the agreed specification and supplies the batch and manufacturing documentation.

The importer remains responsible for compliance with the law of the destination market, including product notification or registration and consumer labelling.
